By streamlining communication and boosting chairside efficiency, the C20 helps transform practices into high-performing, patient focused environments.

# Join the game, And optimize your time.

Seamlessly navigate the patient's mouth. **Our tools enable easy diagnosis, treatment planning, and patient communication, two-way interactive care.**

**Quick to learn, any team member can operate the camera with ease.**

## Bright Halo

Provides a soft, uniform light around the teeth, ensuring exceptional clarity and visibility for precise diagnostics and detailed imaging.

## Fog light

Prevents lens condensation during use, ensuring clear, uninterrupted visuals of the teeth for accurate diagnostics and consistent image quality.

## Automatic flipping

Ensures the image is always correctly oriented, whether capturing maxillary or mandibular views, providing seamless and intuitive imaging without manual adjustments.

# Level up your practice, And boost patient acceptance rate.

High-quality full HD image to help your patients understand their oral health and encourage two way communication that **boosts treatment acceptance rates**.

Highlight before-and-after images to increase your patients understand and build trust.

A **25% growth** was observed by Dr William W. Oakes, and published in an article challenging preconceptions that even if patients have full confidence in their dentist, the use of an intraoral camera significantly improves the acceptance rate.

Oakes W. What do you mean you don't need an intraoral camera? Available at: <http://www.dentaleconomics.com/articles/print/volume-87/issue-1/features/what-do-you-mean-you-dont-need-an-intraoral-camera.html>. Accessed March 2, 2017.
