NSK Standard Contract - terms & conditions

- Depending on the choice of contract level NSK Autoclave Equipment Maintenance Contracts can include protection from 3 to 5 years.
- The contract period is valid from the start date specified on the contract form.
- NSK will cover all routine maintenance, parts and labour during the term of the contract. This includes all general wear and tear, but can also include accidental damage depending on circumstances. Charges may apply at the discretion of NSK if there is a clear and obvious failure to comply with manufacturer's instructions for use and maintenance or abuse of the equipment in question.
- Standard Contract Cover includes One maintenance visit per annum or 1500 cycles, whichever comes first.
- Maintenance and repair turnaround will be within a 48 hour time period from receipt of the equipment in the NSK service department in Stevenage, SG1 2EF, subject to availability of parts. A loan may be provided if requested and subject to availability.
- Free items as part of the NSK Equipment Maintenance Contracts will always be sent directly from NSK. For the majority of the time the free goods will accompany the equipment upon its return but this is not a guarantee and NSK reserve the right to delay the sending of these items should operational issues require this.
- Upon receipt of the details of the NSK Equipment Maintenance Contracts an NSK representative will make contact to run through the correct use and Care & Maintenance procedure with all staff handling the equipment at the practice. It is the responsibility of the practice to maintain training standards as non-compliance with correct use and/or maintenance may invalidate NSK's contractual obligations.
