Synea Power Edition: For the hardest materials

Offers Higher Cutting Efficiency for Better Removal of Hard Substances

The Synea Power Edition 1:4 high-speed contra-angle handpiece has been designed to remove high-strength materials, like zirconia, which have been increasingly used in restorative dentistry.

- Higher cutting efficiency for impressive removal rate.
- Reduced treatment times and improve efficacy.
- 20% longer service life
- New head design for more precise bur guidance

Synea Power Edition: For the hardest materials

Cutting harder materials, causes considerable wear and tear for conventional handpieces by pushing them to their mechanical limits, causing potential downtime, service costs and reduced working life.

A 1:4 contra-angle handpiece provides the ideal solution allowing an optimal working speed up to 160,000 rpm from a standard 40,000 rpm setting.

36 Month Warranty

Contra-angles

High torque and precision

1:5 Speed increasing contra-angles, with FG turbine burs, are recommended for cavity and crown repartion. Due to the maximum speed of 200,000 rpm, aerosol creation is reduced.

1:1 contra-angles are recommended for finishing and polishing.

Osstell Beacon

Implant stability measurement

SKU: 08022260

The Osstell Beacon helps you to objectively determine implant stability and measure the degree of osseointegration without jeopardising the healing process.

It is a fast and non-invasive diagnosis instrument that provides precise information required for making well-informed decisions.

What are the positive outcomes when using the Osstell Implant stability solutions?

- A positive experience for patients, encouraging trust through understanding.
- Enhanced patient education builds confidence, resulting in increased treatment acceptance.
- Improved outcomes for patients with risk factors.
- Enhanced communication between specialists ensuring a more synergistic approach to treatment.
